DETAILED ACTION

Election

Applicant's election with traverse of Group III, claims 45-65 and 88-89, in the reply filed on May 25, 2006 is cknowledged. The traversal is on the ground(s) that the claim should be considered for unity of invention. This is not found persuasive because clearly there is lack of unity between the inventions of Group I and Group II, in particular, Group II lacks a fluid source. Likewise, there is lack of unity between the inventions of Group III and Group IV, in particular, Group III lacks the negative pressure source.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 45-65 and 88-89 are rejected under 35 U.S.C. 102(b) as being anticipated by Zamierowski (U.S. Patent No. 6,071,267). Zamierowski discloses in Figures 1-4 a patient interface system (2) com-comprising an interface drape subsystem (6), a fluid transfer subsystem (4) and a fluid conveyance subsystem (8). Figure 1 illustrating the second fluid transfer element (14) overlying the first fluid transfer element (12), and both of which have a plurality of discrete passageways overlying the wound site (17) and through which the suction tube (28) is

Art Unit: 3743

communicated to the wound and through which the fluid source (30) is communicated to the wound. With regards to independent claims 46 and 54, Figures 2 and 3 illustrating the transfer elements (12, 14) are coupled to and communicated with each other through the opening (20b) of drape 18). The Zamierowski further discloses the interface drape subsystem (6) comprises a film material with a contact adhesive on one side thereof to facilitate adhering the draps (18, 22, 24) to the patient (16) around the wound site (17).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Camtu T. Nguyen whose telephone number is 571-272-4799. The examiner can normally be reached on (M-F) 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry A. Bennett can be reached on 571-272-4791. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
